Fullstack Software Engineer with **3 years** of experience building scalable fintech applications across frontend, backend, and mobile platforms using Next.js, React Native, NestJS, PostgreSQL, and TypeScript. Experienced in backend architecture, authentication systems, real-time communication, and rapid product delivery in startup environments.

Skills

- **Frontend:** React.js, Next.js, React Native, JavaScript, TypeScript, Tailwind CSS, NativeWind, ShadCN/UI, Material UI, Zustand, Redux, TanStack Query, React Hook Form, Zod
- **Backend & Database:** Node.js, Express.js, NestJS, MongoDB, PostgreSQL, Prisma, REST APIs, Firebase Auth, Socket.IO
- **Tools & Cloud:** AWS, Vercel, Git, Axios, Playwright, Vitest

Experience

SDE **Zomint Tech Private Limited** *Mohali, IND* *08/2025 - Present*

- Architected a scalable multi-database fintech backend using NestJS, PostgreSQL, and Prisma with separate platform, MFD, and RIA services.
- Built and maintained multiple fintech products including Plan Creator, CardMatch, LoanMatch, Quarterly Review systems, CSV import workflows and internal operational tools.
- Developing a React Native fintech mobile application from scratch with authentication, real-time advisor-client chat, portfolio workflows, notifications, analytics, and scalable state management.
- Implemented secure authentication and real-time communication systems using Firebase Auth, JWT access/refresh tokens, and Socket.IO with thread-based messaging and live updates.
- Managed end-to-end product delivery across frontend, backend, databases, deployment workflows, and rapid investor-demo requirements while collaborating closely with founders and product stakeholders.

Front-end Developer **ENEST Technologies Pvt Ltd** *Mohali, IND* *10/2023 – 07/2025*

- Improved page load performance by optimizing rendering, lazy loading, and reusable components in React.js applications.
- Owned React Native application development including UI implementation, API integration, debugging, and feature delivery.
- Built dynamic forms, Google Maps integrations, and reusable frontend components across multiple products.
- Developed admin panel features including RBAC, state management, and optimized data tables using React.js and TypeScript.

Personal Projects

- **Cloud-Store:** A modern and secure cloud storage application, designed for seamless file management and collaboration.
 - Built a secure cloud storage application using Next.js, MongoDB, and ShadCN with OTP-based authentication and real-time storage tracking.
 - Implemented advanced search, result caching, and responsive file management workflows for improved user experience.
- **Property-Pulse:** A web application designed to assist users in finding their next rental property.
 - Developed a rental property platform using Next.js with Google authentication, property CRUD operations, Cloudinary uploads, and advanced search.
 - Built interactive features including messaging, notifications, bookmarking, maps integration, and responsive UI workflows.

Education

- **Bachelor of Computer Science** *07/2019 - 08/2022*
Kurukshetra University, Kurukshetra *Percentage – 80%*
